PROFESSIONAL PROFILE

I design and build AI automation systems that eliminate manual work and generate direct business impact. I come from full-stack development — real web products, in production, with payments, emails and SEO. Today I combine that technical foundation with artificial intelligence to deliver complete systems: from the data flow to the conversational assistant that responds to the end user.

Technical background backed by over 10 years in the Peruvian Air Force: discipline, judgment under pressure, and accountability in high-demand environments.

PROFESSIONAL EXPERIENCE

Solmove TSM

Full-Stack Developer

Lima, Peru (Remote)

May 2026 – June 2026

Company with proprietary real-time operations and logistics systems.

- Participated in the redesign and modernization of a fleet monitoring system, collaborating on the migration to an Angular 19 and .NET 8 architecture.
- Configuration and setup of the complete local development environment: ASP.NET Core backend, MySQL database, and Angular frontend.
- Support and maintenance of the legacy production system during the transition to the new system.

Technologies: Angular · ASP.NET Core · .NET 8 · MySQL · Entity Framework Core · C# · Git

Komu AI Software

AI Automation Developer

Canada (Remote)

August 2025 – July 2026

Company focused on developing technology solutions based on automation and artificial intelligence.

- Contributed to the second release of Pablo (usapablo.com) — an AI-powered financial assistant on WhatsApp with active users: designed onboarding flows and payment automations in n8n.
- Built the Instagram analytics pipeline for @rodrigo.al.millon (+95K followers), the anchor account for Pablo's promotion: extraction via Instagram Graph API, processing of +400 historical posts with metrics by hour, day and content type, and semantic caption analysis with GPT-4o-mini (topic, hook, emotion, narrative structure).
- Developed a conversational agent for natural language analytics queries, eliminating the need to manually review spreadsheets.
- Participated in the frontend development of Pablo's landing page in Astro, contributing to user onboarding and iterative product improvements.

Technologies: n8n · JavaScript · OpenAI API · GPT-4o-mini · Instagram Graph API · Google Sheets · Notion API · Astro

Fuerza Aérea del Perú

Head of Communications and IT Section

Technical Support and Operational Support

Lima, Perú

January 2026 – Present

2014 – 2025

- **Responsible for the unit's technology management: oversight of networks, IT systems and assets under military security and availability standards.**
- **Advise Command on decisions regarding modernization and institutional technology infrastructure.**
- **Drive digitalization initiatives and internal process improvements aligned with the institutional regulatory framework.**
- **Train personnel in networks, systems and technology tools.**
- **Over 10 years of service in the FAP. Training in operational discipline, work under pressure and accountability in high-demand environments.**

PROFESSIONAL PROJECTS

Analiacamarda.com

Bilingual E-commerce Website

Website focused on automated sales of digital products, lead generation and recurring subscriptions for the Spanish and English-speaking markets

- **Full-stack development of bilingual website (EN/ES)**, with Astro v6, Tailwind CSS v4 and TypeScript, deployed on Vercel with hybrid SSR.
- **Implementation of automated payment system with Stripe** — Payment Links, webhooks for automatic PDF delivery and recurring subscriptions.
- **PayPal Integration** as an alternative payment method via Payment Links.
- **Secure file storage system** with Vercel Blob (Private) and download proxy with server-side authentication.
- **Automated transactional emails** with Resend — digital product delivery, lead magnets and Premium subscription welcome.
- **Full SEO optimization**: canonical URLs, bilingual hreflang, Schema JSON-LD, Google Search Console, llms.txt for AI crawlers.
- **DNS infrastructure setup** on GoDaddy for Vercel and Resend (DKIM, SPF, MX).
- **UX/UI responsive mobile-first** with Tailwind CSS — scroll snap, adaptive design and component optimization.

Technologies: Astro v6 · Tailwind CSS v4 · TypeScript · Stripe · Vercel · Resend

Real Estate Quote Bot

Mexico Client (*Delivered*)

AI conversational assistant to automate quote generation for a real estate development in Veracruz, Mexico.

- **The bot guides the sales agent step by step**, calculates amounts by payment method and automatically generates a professional PDF.
- **Google Sheets Integration** for quote logging and Google Drive for document storage.
- **PDF Generation** automated via PDFShift API

Technologies: n8n · OpenAI API · Telegram Bot API · Google Sheets · PDFShift
